7. Key Recommendations

Priority Actions

1. URGENT: Restock low inventory items to prevent stockouts

- Focus on critical medications with high demand
- Review supplier delivery times for expedited orders

2. HIGH: Address expiring inventory to minimize wastage

- Implement promotional pricing for items expiring within 30 days
- Transfer slow-moving expiring items to high-demand branches

3. MEDIUM: Optimize inventory carrying costs

- Review overstocked items and adjust reorder quantities
- Implement Just-In-Time ordering for non-critical items

4. ONGOING: Monitor consumption patterns using AI forecasting

- Leverage ML models for demand prediction
- Adjust minimum stock levels based on seasonal trends
